Timings from the playlists. Each figure sums the CPL durations in that playlist – slide, every 4s black buffer, the pre-show vertical, and the films – added to the start time.

Blocks carry a vertical. Each Cathedral block plays a vertical ad after the opening slide; its length is included in the runtime.

Boulevard Nights plays off the OPPO Blu-ray, not a DCP – switch the projector to that input for the 7pm show.

South Hall runs DCP-o-matic on its own Mac from Wandrive; the Cathedral rooms run easyDCP off LAMBDA + CHI (keep CHI mounted for the ads).
